As a final-year student majoring in Information Systems at Bina Nusantara University, I am a dynamic and highly motivated student who utilises technology to solve complex problems. I bring valuable experience from an enriching internship at a leading technology company, where I had the opportunity to apply my academic knowledge in a real-world scenario. I have a Basic Web Programming Learning license and certification, which underscores my commitment to staying ahead of technology trends. This certification has equipped me with basic skills in web programming, laying the foundation for my proficiency in creating dynamic and responsive web applications.
